Ejercicio 3 - Contenedores en red: Adminer y MariaDB

Realizado por Ángel Durántez, Sergio Álvarez y Adrián Vega

crear una red bridge redbd

root@clientedocker:/home/cliente# docker network create redbd

```
root@clientedocker:/home/cliente# docker network ls
NETWORK ID
              NAME
                                 DRIVER
                                          SCOPE
39d941cfe7d2
                                          local
              bridge
                                 bridge
c6e09af775b6
                                          local
              host
                                 host
7aa884019cd6 none
                                 null
                                          local
bd9d8f20d167 red_guestbook
                                 bridge
                                          local
db385f6eeba7 red_temperaturas
                                 bridge
                                          local
bbedab3a3d9d red wp
                                 bridge
                                          local
9f7dcd163d63 redbd
                                           local
                                 bridge
root@clientedocker:/home/cliente#
```

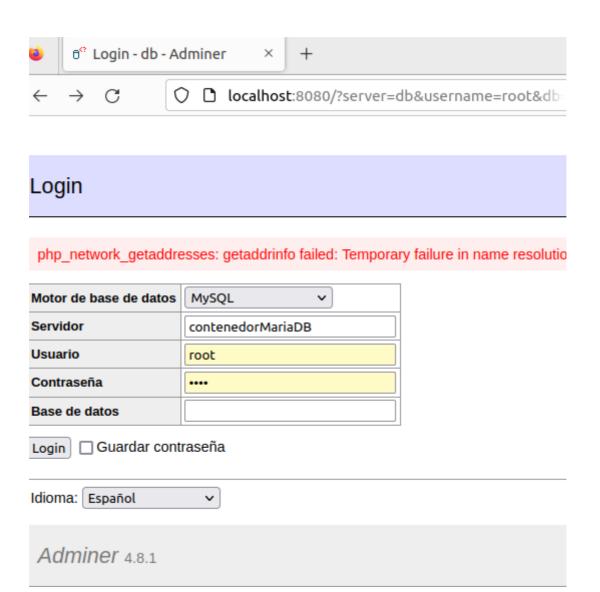

crear contenedor con imagen mariadb

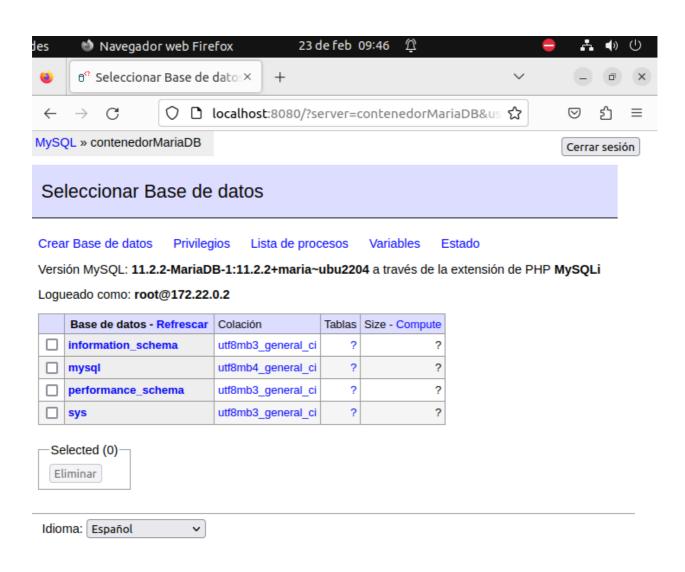

root@clientedocker:/home/cliente# docker run -d --name contenedorMariaDB --netw ork=redbd -p 3306:3306 -e MYSQL_ROOT_PASSWORD=1234 -v /home/cliente mariadb 4c10feda853d0afdcddbd4d7bb2dce6d50fea1422209d409d9f6a597ea844d72 root@clientedocker:/home/cliente#

contenedor adminer

root@clientedocker:/home/cliente# docker run -d --name contenedorAdminer --netw ork redbd -p 8080:8080 adminer

acceso al contenedor Maria DB desde adminer en el localhost: 8080

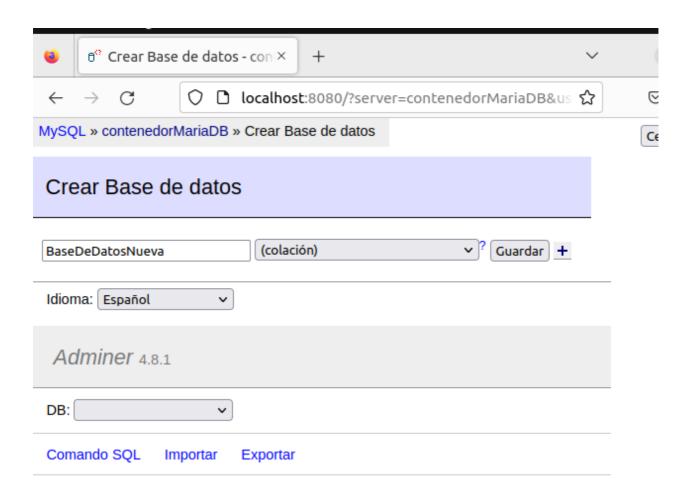

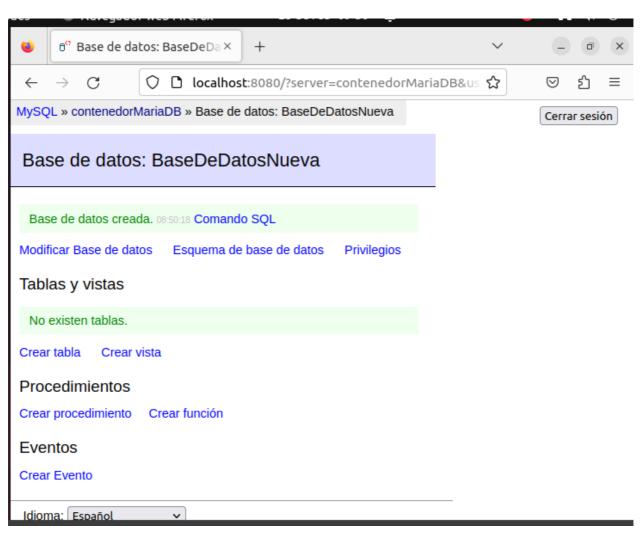

ENTREGA

Contenedores creados y funcionando

```
root@clientedocker:/home/cliente# docker
CONTAINER ID
               IMAGE
                                               COMMAND
                                                                         CREATED
        STATUS
                                          PORTS
      NAMES
0f3d8d184ffe
                                               "entrypoint.sh php -..."
               adminer
                                                                         8 minutes
                                          0.0.0.0:8080->8080/tcp, :::8080->8080/
        Up 8 minutes
ago
      contenedorAdminer
               mariadb
4c10feda853d
                                               "docker-entrypoint.s..."
                                                                         24 minute
s ago
        Up 2 minutes
                                          0.0.0.0:3306->3306/tcp, :::3306->3306/
      contenedorMariaDB
tcp
```

Creacion base de datos interfaz de adminer

Check de la base de datos nueva en consola

```
root@4c10feda853d:/# mariadb -u root -p
Enter password:
Welcome to the MariaDB monitor. Commands end with ; or \g.
Your MariaDB connection id is 13
Server version: 11.2.2-MariaDB-1:11.2.2+maria~ubu2204 mariadb.org binary distri
bution
